Dr Jain is our Principal Anaesthetist at CSP and is a Consultant in Intensive Care Medicine at the Homerton University Hospital.

Over the years she has developed a passion for non-surgical aesthetics and has developed her skills to cover a broad range of injectables – botulinum to smooth out wrinkles, dermal fillers & stable hyaluronic acid for tightening & plumping. As well as this, she is fully trained and a recognised prescriber for award winning prescription skincare brands including Obagi & ZO.

Through treating countless patients over the past 7 years, Susan has perfected her approach and her ethos builds on understanding the concerns of the individual and designing an achievable skincare regime together with injectables to create the best and most natural results that are possible.

Clinical Interests & Specialities

- Anti-Ageing Injections
- Tightening and lifting treatments to the upper and lower face.
- Excessive Sweating treatments
- Obagi prescription-strength skin-care programmes for acne, scarring and pigmentation
- Basic and advanced dermal fillers treatments which include lip enhancement, nose reshaping, deep nose-to-mouth lines and corners of the mouth.
