Dr Rai has trained but nationally and internationally at reputable academic institutions where she has been trained by some of the best minds in Dermatology. Dr. Rai is double fellowship trained with completion of a JRPTB approved U.K fellowship and separate skin cancer and Procedural Dermatology fellowships at the Yale Centre of Dermatologic Surgery, Connecticut and The Mount Sinai Dermatology Centre in New York, USA.

Dr Rai practices a kind and compassionate approach to the diagnosis and treatment of all her patients and has a thoroughly professional manner. This has allowed her to run a successful NHS and Private practice here in London with particular focus on Skin cancer recognition and surgery and cosmetic Dermatology and Cosmetic Surgery.

Dr. Rai consults on a wide range of Dermatology issues including general skin care enhancement consults providing a roadmap for those looking to age gracefully and naturally with minor yet effective cosmetic improvements in a timely manner, to more invasive procedures such as botulinum toxin injections, facial contouring with dermal fillers ,facial volumising with dermal fillers, laser procedures, cellulite treatment, body contouring and hair enhancement and growth therapies.

Dr. Rai also believes in research and innovation which she is regularly involved in as a part of her NHS role. She carries this approach forward to her private practice and keeps up to date with new technology and treatments in order to enhance the lives of her patients.

Dr. Rai consults children for general skin conditions and lumps and bumps removal.

Dr. Rai's friendly and compassionate approach continues to affect her patients lives in a positive way and she relishes these relationships with this being the best aspect of her practice.
